Hello! I am a student in software quality and assurance engineering at CCTB. I work with the Python programming language and have a strong enthusiasm for learning new things. Being a fast learner is an asset, and I am fully committed to giving my best effort to understand and meet any demands. I thrive on transforming challenges into opportunities for growth. In my last role, I didn't just meet expectations, I redefined them. When faced with inefficiencies, I took ownership: I audited every process, identified bottlenecks, and proactively redesigned workflows to eliminate waste and boost productivity. But I didn't stop there. I scrutinized areas others overlooked, asking, 'How can this be better?' Whether it was streamlining communication, automating repetitive tasks, or redesigning tools to save time, I pursued excellence relentlessly.

Laziness isn't in my vocabulary. While others might settle for 'good enough,' I pushed boundaries. For example, when I saw the academic department manually creating all the PDFs and sending them to the students, I created a VBA code to create the certificates and an app developed in Python to send the certificates to all students. This cut the time to do it in days, or, depending on the demand, weeks. My mindset? If it can be improved, it will be improved.

I'm not just a problem-solver, I'm a results-driven innovator. And I'm ready to bring that same energy to your team. Hire me, and you'll gain someone who learns fast, adapts faster, and never shies away from hard work. I don't just promise effort; I deliver measurable impact. Let's discuss how I can do the same for you. And I graduated with a high score in a competitive high school in Brazil, so school subjects are one of my strengths.

Work Experience

IT Analyst

CDPI pharma-Goiânia, Goiânia / Brazil

March 2024 to March 2025

I learned how to work with Windows servers and had some network experience. I am a fast learner and I have the will to work.

Education

Post-secondary education in Software Engineering

CCTB - Vancouver, BC

May 2025 to Present

I built a mass email sender with documents to a College in Brazil, coded in Python. I also completed the Python course from Harvard CS50P. And I am enrolling along with my diploma, the CS50 computer science course from Harvard, and the projects inside it.

Skills

- Python
- Microsoft Office
- English
- Windows
- Technical support
